

# Práctica 04 Producto Punto

Sea  $u \cdot v$  el producto punto entre dos vectores y  $\theta$  el ángulo entre ellos

$$u \cdot v = \sum_n u_i * v_i$$

si  $(u \cdot v)$  es

$u \cdot v = 0$ , entonces  $\theta = 90^\circ \therefore$  son ortogonales

$u \cdot v < 0$ , entonces  $\theta > 90^\circ$

$u \cdot v > 0$ , entonces  $\theta < 90^\circ$

$$u \cdot v = \|u\| \|v\| \cos(\theta)$$
$$\cos(\theta) = \frac{u \cdot v}{\|u\| \|v\|}$$

Materia: Tópico II. (Procesamiento Paralelo con CUDA)

Sea  $u \cdot v$  el producto punto entre dos vectores y  $\theta$  el ángulo entre ellos

$$u \cdot v = \sum_n u_i * v_i$$

si  $(u \cdot v)$  es

$u \cdot v = 0$ , entonces  $\theta = 90^\circ \therefore$  son ortogonales

$u \cdot v < 0$ , entonces  $\theta > 90^\circ$

$u \cdot v > 0$ , entonces  $\theta < 90^\circ$

$$u \cdot v = \|u\| \|v\| \cos(\theta)$$

$$\cos(\theta) = \frac{u \cdot v}{\|u\| \|v\|}$$

$$\vec{u} = (1, 5, -3) \quad \|\vec{u}\| = \sqrt{1^2 + 5^2 + (-3)^2} = \sqrt{1 + 25 + 9} = \sqrt{35}$$

$$\vec{v} = (5, 10, 8) \quad \|\vec{v}\| = \sqrt{5^2 + 10^2 + 8^2} = \sqrt{25 + 100 + 64} = \sqrt{189} = 3\sqrt{21}$$

$$\vec{u} \cdot \vec{v} = (1 * 5) + (5 * 10) + (-3 * 8) = 5 + 50 - 24 = 31 \quad \therefore \theta < 90^\circ$$

$$\cos(\theta) = \frac{u \cdot v}{\|u\| \|v\|} = \frac{31}{\sqrt{35} * 3\sqrt{21}} = \frac{31}{21\sqrt{15}} = 0.381150$$

$$\theta = 67.595019^\circ$$
